Level 2: The fair value of financial instruments that are not traded in an active market (for example, over-the-counterderivatives) is determined using valuation techniques which maximize the use of observable market data and rely as little as possible on entityspecific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

Level 3: If one or more of the significant inputs is not based on observable market data, the instrumentis included in level 3. This is the case for unlisted equity securities.

14 RECOGNIZED FAIR VALUE MEASUREMENTS - NON-FINANCIAL ASSETS

(i) Fair value hierarchy

There were no transfers between levels 1 and 2 for recurring fair value measurements during the period. Further, there was no transfer in and out of level 3 measurements.

(ii) Valuation techniques used to determine level 2 fair values

The Company obtains independent valuations for its property, plant and equipment and investment properties after regular intervals. The management updates the assessment of the fair value of each property, taking into account the most recent independent valuations. The management determine a property's value within a range of reasonable fair value estimates. The best evidence of fair value of land is current prices in an active market for similar lands. The best evidence of fair value of buildings is to calculate fair depreciated market value by applying an appropriate annual rate of depreciation on the new construction/ replacement value of the same building. The best evidence of fair value of electric installations is to calculate fair depreciated market value by applying an appropriate annual rate of depreciation on the replacement value / new purchase of the same electric installation

13 RECOGNIZED FAIR VALUE MEASUREMENTS - FINANCIAL INSTRUMENTS

(i) Fair value hierarchy

Judgments and estimates are made in determining the fair values of the financial instruments that are recognized and measured at fair value in these condensed interim financial statements. To provide an indication about the reliability of the inputs used in determining fair value, the Company classifies its financial instruments into the following three levels. However, as at the reporting date, the Company has no such type of financial instruments which are required to be grouped into these levels. These levels are explained as under:
